

# BRGX™

## NON-ENTRY VAPOR PHASE CLEANING

BRGX™ removes heavy oil and other tough petroleum contaminants including:

- Crude oil
- Asphalt
- Wax fuels
- Other hydrocarbon-based material

BRGX™ is formulated to dramatically expedite the cleaning of hydrocarbon-cargo marine vessels. Using our patented VaporX® cleaning process, it is primarily focused on a vapor phase system that can eliminate the need to place personnel inside the marine barge/tanker.

### REDUCES CONCERNS

BRGX™ reduces concerns about safety, the environment, and regulations.

The VaporX® cleaning process eliminates the need for personnel to be inside the environment during cleaning. The fully organic solvent eliminates LEL, H2S, and other noxious gases.

### RELIABLE

BRGX™ prepares hydrocarbon barges and tankers for repair, inspection, and service changes – expediting maintenance time.

### AVAILABLE SIZES

- 55-gallon
- 275-gallon containers

REPLACING HAZARDOUS SOLVENTS WITHOUT COMPROMISING EFFECTIVENESS
